

SPS Parma 2013

Drivetec s.r.l., official distributor of Hitachi PLC in Italy, presents the new and powerful EHV+ Series manufactured by Hitachi Industrial Equipment Systems during the SPS exhibition in Parma.

Hitachi has implemented the newest CODESYS standard, 5 languages according with the IEC61131-3, into their innovative modular PLC.

The network communication capability includes EtherCAT, Modbus-TCP and Ethernet/IP (available soon).

The existing I/O modules of the EH-150 series are suitable for the new CPUs, thus offering an entire family of modular PLC, covering almost any kind of needs.

For users who until now had never approached the recent Hitachi modular PLC series, have now the chance to evaluate the powerful and convenient Hitachi PLC series.

To learn more about Hitachi PLC please visit us on booth C069 - Pav.2.
